

# Contents

<b>ANALYSIS AND MODELLING .....</b>	<b>1</b>
Development of the Vertical Axis Restraint Internal Erosion Direct Shear Box <i>by C. J. MacRobert</i> .....	3
Simplified Approach to the Design of Concrete Block Retaining Walls <i>by J. M. Du Plessis, C. Martella, T. A. L. Green</i> .....	13
The Influence of Material Grading on Strength and Stiffness <i>by L. Geldenhuys</i> .....	23
Verifying Ground Treatment using the Secondary Permeability Index (De Hoop Dam, South Africa) <i>by B. R. Jones, J. L. van Rooy</i> .....	33
The Effect of Cyclic Loading on Pore Pressures in a Railway Formation Material <i>by M. V. Schulz-Poblete</i> .....	43
Effect of Groundwater Extraction-Induced Differential Settlement on Structural Behaviour <i>by F. L. M. Gomachab</i> .....	53
The Behaviour of Reinforced Soil Mattresses Spanning Cavities <i>by N. G. Slawson</i> .....	63
Ground Subsidence Detection System <i>by W. J. Grosskopf</i> .....	73
The Effect of Cyclic Thermal Loads Behind Integral Bridge Abutments Using DEM <i>by S. Ravjee</i> .....	83
Linking Safety Factor to Probability of Failure <i>by S. M. Gover</i> .....	93
An Overview of the Discrete Fracture Network (DFN) Approach and its Applications in Geotechnical Engineering <i>by V. Kuppusamy</i> .....	103
Basic Applications of Reliability Based Design Methods in Geotechnical Engineering <i>by C. O'Brien, T. O'Brien</i> .....	113
Cave Mining Propagation Modelling in a Centrifuge <i>by M. M. Smith, W. Britz</i> .....	125
The Influence of Soil Grading on the Performance of a Segmental Block Retaining Wall – a Centrifuge Model Study <i>by J. van Niekerk</i> .....	137
Towards a Variable Probability Method <i>by Y. Arunachellan, G. Priest</i> .....	147
Computational Difficulties in Predicting Phreatic Surfaces in Coarse Coal Discard <i>by C. J. MacRobert</i> .....	159
<b>MINING AND ENVIRONMENTAL .....</b>	<b>169</b>
Site Selection Process for a Tailings Storage Facility in Cacata, Angola <i>by K. S. Magoro</i> .....	171

Converting a Mechanised Mine to a Conventional Mine and the Associated Challenges as Experienced at Lonmin’s Saffy Shaft <i>by S. Liebenberg</i> .....	181
Routine GPR Mapping of UG2 Chromitite Triplets <i>by Z. Thebethe</i> .....	189
Elandsdrift Fault Zone (Graben Structure), Managing the Complexity & Geotechnical Challenges <i>by A. J. Barnard</i> .....	197
Geotechnical Block Modelling for the 3-Dimensional Visualisation of Rock Mass Quality in the Mining Environment <i>by D. Sewnun, O. Pillay, M. Wanless</i> .....	207
Support Strategies to Safely and Effectively Develop Through the Elandsdrift Fault Zone <i>by E. Munsamy</i> .....	217
On the Influence of Varying Aperture on Flow Mechanisms in an Initially Dry Vertical Smooth Parallel Fracture Under Free-Draining Conditions <i>by K. P. Segole, J. L. Van Rooy</i> .....	227
Yield and Critical Strength Ratios for South African Gold Tailings <i>by D. Venter</i> .....	237
Desludging Wastewater Ponds Using Geotextile Dewatering Bags <i>by J. J. O. Oriokot, D. Bate, G. Dirks</i> .....	249
Designing with Geosynthetics in Capping <i>by R. Sousa, E. Zannoni</i> .....	257
<b>SITE INVESTIGATION AND TESTING .....</b>	<b>269</b>
Can One Use the Dynamic Cone Penetrometer to Predict the Allowable Bearing Pressure? <i>by K. A. Mogotsi, F. H. van der Merwe</i> .....	271
The Relationship Between the Bearing Capacity of a Screw Pile and the Total Work Done During Its Installation <i>by A. V. Mdlalose, K. Mbanya</i> .....	281
Tzaneen Dam Raising – Geotechnical Investigation <i>by C. van Dyk</i> .....	293
Comparison between Various Correlations to Determine Soil Parameters for Platinum Tailings Using Piezocone Testing <i>by P. F. Oelofse</i> .....	303
Typical Parameter Ranges for Classification Laboratory Tests <i>by H. F. T. Barnard, V. Venter</i> .....	315
An investigation on the Relationships between the Petrographic, Physical and Mechanical Characteristics of Sandstones from the Newspaper Member of the Natal Group Sandstones <i>by D. Naidoo, M. Ferentinou</i> .....	325
Investigating Dolomitic Land <i>by L. R. Richer, A. G. A’Bear</i> .....	335
Measurement of Clay Fracture Strain with a Bending Beam Test <i>by D. H. Marx</i> .....	343

Towards the Development of an Indirect Method of Predicting the Shear Strength Properties of Shales by <i>P. Naidoo</i> .....	353
Guidelines for Problematic Soils in Southern Africa – a Laboratory Perspective by <i>T. Grobler</i> .....	363
A Review of the Geotechnical Properties of Wad from the Oaktree Formation in Centurion, South Africa by <i>D. Bester, A. G. A’Bear, P. W. Day</i> .....	375
Hydrometer Under the Microscope by <i>P. K. Monye, P. R. Stott, E. Theron</i> .....	385
Pipe Leakage Detection by Measuring Change in Soil Temperature by <i>D. L. Maphanga</i> .....	395
An Experimental Correlation Study on Soil Properties of Lime Stabilised Soil Samples by <i>P. H. Bhengu, D. Allopi</i> .....	407
Potential Aggressive Ground Conditions on Buried Concrete and Copper Earth Mat at a Substation in Orlando, Soweto by <i>S. Nyathi</i> .....	417
Investigating the Tensile Behaviour of Unsaturated Gold Tailings using the Brazilian Disc Test by <i>T. A. V. Gaspar</i> .....	427
Laboratory Measurement of Rock Joint Stiffness by Experimental Techniques by <i>A. W. Bezuidenhout</i> .....	437
The Role of Geomorphology in Geotechnical Engineering by <i>N. Mabilo, S. Ndlovu</i> .....	449
Geotechnical Properties of the Ground Profile at the Great Dyke of Zimbabwe by <i>B. M. Mmileng, H. F. Booyens, H. Gumindoga</i> .....	455
<b>CONSTRUCTION AND CASE STUDIES .....</b>	<b>465</b>
Upstream Raise Tailings Dams from a Low Risk Appetite Perspective: A Case Study by <i>R. van der Westhuizen, G. Coetzer</i> .....	467
Remediation of Shallow Undermined Ground beneath a Pipeline by <i>M. V. Harmse, M. M. Dlamini</i> .....	475
Reinstatement of the Hazelmere Dam Grout Curtain by <i>T. Pretorius</i> .....	485
Booyensdal Central Development by <i>J. S. Taljaard</i> .....	495
The Viability and Feasibility of Using Recycled Concrete and Masonry Aggregates in the Pipe Laying Industry by <i>A. Lodenkemper</i> .....	503
Case Study and Lessons Learnt: The Construction of Mechanically Stabilised Earth Walls at Mount Edgecombe Interchange by <i>C. Purchase, F. H. van der Merwe</i> .....	513

Use of Crushed Concrete Aggregate Waste in Stabilization of Clayey Soils for Sub Base Pavement Construction by <i>O. Kashoborozi, E. Aturinda, S. Jjuuko, D. Kalumba</i> .....	523
Geotechnical Design Drivers for Super Tall Buildings in the Middle East by <i>G. Wojtowitz, T. E. B. Vorster</i> .....	529
Effectiveness of Impulse Compaction (IC): A case study of Deepwater Container Terminal extension in Gdansk (Poland) by <i>M. Panek, R. Buca, O. Mitrosz</i> .....	541
Ground Stabilization Techniques in South Africa: Research and Project Study by <i>E. Zannoni, D. Kiptoo, D. Kalumba</i> .....	553
True Bridge Abutment Using Geosynthetic Reinforced Soil: Principles and Applications by <i>J. De Beer, E. Zannoni, J. Meadows</i> .....	565
Designing a Paved Road Using Geogrids to Reduce the Thickness of the Pavement Layers by <i>H. C. Melling, K. S. Tusabe, S. Jjuuko, D. Kalumba</i> .....	575
A Review of Sonic Echo Pile Integrity Testing on Cast In-Situ Piles Founded on Soil or Rock by <i>H. M. Kgole</i> .....	585
Temporary Structures: Sheet Pile Applications by <i>G. S. Mthembu</i> .....	597
The Geotechnical Design Verification Process Followed for the Qatar Redline South Underground Metro Rail Project by <i>S. Naidoo, J. Schoombee</i> .....	609
<b>FOUNDATIONS AND GROUND IMPROVEMENT</b> .....	<b>617</b>
The Determination of Edge Penetration Distance Underneath a Raft Foundation on Expansive Clays by <i>D. M. Bester, E. Theron, P. R. Stott</i> .....	619
Discussion on Sinkhole Repair Using Dynamic Compaction by <i>B. Klaas, T. Pretorius</i> .....	631
Wind Energy Civil Geotechnical Aspects by <i>D. J. Avutia</i> .....	641
Achieving Improvement with Dynamic Replacement Stone Columns – Impact Crater Depth -Capacity Evaluation by <i>F. H. van der Merwe, C. Purchase</i> .....	653
<b>SLOPE STABILITY AND LATERAL SUPPORT</b> .....	<b>663</b>
Assessing the Stability of Road Cuttings on the Zuurberg Pass using Romana’s Slope Mass Rating by <i>P. van Helsdingen</i> .....	665

Successful Application of a Flexible Slope Stabilisation System as the Replacement of a Failed Hard Facing Installation on a Creeping Soil Slope by <i>T. Hangartner, G. Sims, R. Tshishiku, C. Balg</i> .....	675
Slope Stabilization and Erosion control of Gullies in Edo State, Nigeria by <i>M. C. Tshilande</i> .....	685
Use of Lime Piles as an Alternative Method for Stabilisation of Road Embankments by <i>J. R. Nakyeyune, S. Bamwesigye, S. Jjuuko, D. Kalumba</i> .....	695
Reliability Assessment of Limit State Designed Slopes Using First Order Reliability Methods Coupled with Response Surface Methodology by <i>A. S. Zwiers, P. W. Day</i> .....	703
The Back Calculation of Shear Strength Parameters for Soils on Steep Slopes by <i>D. M. Roos</i> .....	713
